

I wish for you to understand that Air1 serves me as a resident of the community of Riverside County. Their service has improved my quality of life. I am aware of many others in the local community would have their quality of life lessened by the disappearance of Air1 broadcaster and a LPFM replaced them with other programming. I believe that the service that Air1 provides to the community is in the public interest because it provides support to those with religious beliefs. I believe having Air1 will provide freedom of speech to those who are interested in religious themes.
